**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on April 7, 2008 has been entered.
  
2. Claims 6-7, 9-20, 29, 30, 32-43 and 47-55 are pending in the present application.

***Information Disclosure Statement***

3. The information disclosure statement (IDS) submitted on April 7, 2007 has been considered by the examiner, note attached copy of form PTO 1449.
  
4. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. However the references in the search report were *previously listed* on form PTO 1449 filed May 21, 2004. The considered IDS was mailed June 21, 2006 for Search Report PCT/EP03/131158, all references were considered except for Stefani inwhich there was no translation.

***Allowable Subject Matter***

5. Claims 6-7, 9-20, 29, 30, 32-43 and 47-55 are allowed.

6. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the method and system of replicating data objects from a source system to a target system as cited in independent claims 6, 7, 14, 1729, 30, 37, 40, 47, 50, 51, 54 and 55. The prior art of record fails to disclose the structure of a first, second and third data field within an electronic element and its configured state function for changing a state identifier. Specifically regarding independent claim 6, the following limitation is not disclosed as claimed: "wherein the third data field is configured to store data representing whether the identifier stored in the first data field is a default identifier". Regarding independent claim 7, the following limitation is not disclosed: "replicating, in response to changing the state of the identifier, the one or more processed data objects from the source system to the target system; and changing the second data field from the first state to the second state". Regarding independent claim 14, the following limitation is not taught as claimed: "setting a lock on the electronic data element; examining the second field of the electronic data element; and if the state of the second field of the electronic data element is the first state or the second state, preventing a change in the state of the second field to the third state". Regarding claim 17, "replicating, in response to changing the state of the identifier, the one or more processed data objects from the source system to the target system; and

share locking the electronic data element". Regarding independent claim 47, "wherein the software application is a business application; and claim 50, "wherein the one or more data objects includes at least one booking, accounting, invoicing, receipt, or voucher data object" is not disclosed as claimed. Independent system claims 29, 30, 37, 40, 51, 54 and 55 parallel the limitations of method claims 6, 7, 14, 17, 47 and 50; therefor they are allowed for similar reasons as stated *supra*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
